

# School With In a School Model

Keystone Prep is introducing a wonderful new school within a school named the...

## The Réussir Program

(sounds like rue sear)

**“Réussir” is a French word meaning “to succeed.”** The word “Réussir” is identified in greater detail as being associated with: to achieve, to do well, forge ahead, and succeed. Those are the exact descriptors we seek for the students who enroll in the **The Réussir Program!** Every great institution in the world that ever truly succeeded had woven into its tapestry, the care of others less fortunate. This integral agenda, as a part of the fabric of those institutions, changed the world to make it a better place for all of mankind. From those dedicated changes, all of humanity benefitted. Man became more aware of those who were different, but yet possessed limitless possibilities, if only those opportunities could be explored in the right environment. **The Réussir Program** is committed and dedicated to doing just that for its students.

It is the mission of Keystone Prep High School to create a world for all students that ensures their success. Our students have challenges unique to them, as do the students who will attend **The Réussir Program**. No student should be judged or discriminated against because of those differences beyond their control to change. Every parent wants their child to succeed. Every child deserves the right to do so. Each child has unlimited and priceless value to the parents who love them, and to the society they impact, if given the chance. Keystone Prep believes the students chosen to attend **The Réussir Program** will teach us and our less challenged students far more about life, than we will ever teach them. Our current students will learn countless lessons from the students enrolled in **The Réussir Program**. They can observe unadulterated joy in their smiling faces, while they possess the least of social abilities. They can see incredible personal work effort from them, as these students show sincere appreciation to just be given an opportunity to work alongside of “regular” kids, as they call them, on a school project. The Keystone Prep students will see firsthand how to overcome their own unique challenges, as they look at the more difficult challenges the students enrolled in **The Réussir Program** face every day. Current Keystone Prep students will begin to count their blessings, instead of the cost of their accommodations, as they see others less fortunate drive themselves to success, where not previously thought possible. Keystone Prep is committed to teach not only our current students, but our staff, and our families, the only limitations a child has are the ones he places on himself.

**The Réussir Program** is designed to eradicate any limitation in the way of those children to achieve what they never thought possible. This is an incredible opportunity for Keystone Prep as an institution, and for our students. KPHS students will shine as they learn more about the Réussir students, and how they can impact them. Many of our current students have never seen themselves in leadership roles, or had the confidence to do good things for others, that leads to better work ethics and greater responsibility... skills both the staff of Keystone Prep and the parents who enroll their students with us, want to see in each child who attends this fabulous school. The Réussir Program will provide the opportunity for other children to succeed, as well as helping our own current students reap the blessings of new leadership opportunities

and greater care and compassion for the Réussir students. This program is a win/win for all students! We are very excited to present the well-researched school within a school project, **The Réussir Program**.

The Réussir Program will be a self-contained classroom of six students the first year. The staff member selected for this classroom will possess unique skills, to make them a perfect fit for the Keystone Prep mission and goals. Integration of these students where appropriate and into other classrooms will take time and be cultivated carefully, on a one on one basis, based on the abilities of the traditional teacher to properly nourish and guide a Réussir student, through training and support. Key teachers will be selected the first year to broaden **The Réussir Program** model, based on their professional abilities and their individual capacity to impact the Réussir student, into a healthy and nourishing classroom. No student will ever be placed, if not a good fit for the Réussir student and for the Keystone Prep Classroom. When introducing a new educational model into an existing educational system, the most important component is the pace one sets on that integration. Great care must be taken to explore mutual opportunities and find the right professionals to go forward. Each student must be considered first at the top of this learning curve.

Réussir students will be encouraged to participate in all other high school experiences, beyond the traditional academic classroom. Yes they will need more individualized attention, however in every other way they are just our high school students. The Réussir enrollees need to enjoy their high school days, just like every other high school student. These students need positive social interactions, fellowship through friends, and most of all - great high school memories. They also need individual guidance for their future opportunities both academically and vocationally, and to know how to best become contributing and successful members of society. **The Réussir Program** is designed to give students the highest quality opportunity for a custom designed, skill-based future. Réussir does just that – helps them become all they can be!

### **An average day in the life of a Réussir Student...**

8:30 – 9:00 Arrival – discussion if their previous day night, preparing for today

9:00 – 10:00 Academic Skills – Critical Thinking Skills, English, Reading, Writing, Responding, Repetition

10:00 – 11:00 Outside or Lab Experiences in Applied Sciences, Eco System Studies, and Nature Science

11:00 – 12:00 Academic Skills – Equation Learning, Geometric Studies, Mathematics, and Problem Solving

12:00 – 12:45 Lunch **integrated** with all Keystone Prep students

12:45 – 1:00 Class Restroom Break (students will also be allowed to use the facilities as needed at other times during the day with their teacher's approval and based on how they conduct themselves)

1:00 – 1:30 Computers and Research – Applied Specifics and Individualized Learning Projects

1:30 – 2:30 Computer Applications with Partners – **integrated** - Community and Student Partners Tutor

2:30 – 3:30 Life Skills, Applications for Self-Maintenance, Mainstreaming, Appropriateness, Socialization

Students selected for **The Réussir Program** opportunity will benefit from a rigorous educational model that best prepares them for true life experiences. This program will assist, develop, and guide them into achieving their greatest potential to become contributing and productive, successful members of society.
